Yacht Description

IN PERFECT CONDITION

Here is an incredibly well preserved, maintained and continuously operated genuine Paddle Steamer!

She is Europe's largest paddle steamer.

"Unforgettable", "Impressive" and "Royal" are a few reactions of guests, who have made a trip on this historic paddle steamer.

Once aboard, guests will experience the feeling of days gone by.

The ship is in a mint condition. This authentic paddle steamer from 1926 is more than 80 metres in length, with a beam of almost 16 metres.

A 750 horsepower steam engine assures the giant paddles run smoothly.

A complete refit and a high standard restoration took place from 1994 thru 1999.

Everybody will enjoy the nostalgic atmosphere. The lounges of the steamer are beautifully decorated in styles of different periods. The old and the new give this vessel a royal look.

Even though the paddlesteamer was built in 1926, her technique and facilities are totally modern. A telescopic stage-lift spectacularly takes the chef's culinary meals from the kitchen to the main and the upper deck. This lift can also be used for product presentations or a surprising way to let special guest enter the party.

The owners are ready for their next project and are hopeful this grand old Lady will continue to perform and serve her next Masters, as she has faithfully done for decades past, present and future!

Inspections are highly recommended !! You will be impressed.
